Cuidemos el medio ambiente.

🇦🇷 La Pampa, Patagonia Argentina

The Pampean plains and the Patagonian steppes, only an hour away by plane from Buenos Aires, arriving in the capital of the province, Santa Rosa. A city where contemporary architecture invites visitors to a walk through its civic center. And options ranging from an international casino, a golf course (only 3 km away from the city center), tourism sites of faith, the Handcrafts Market, a tourist winery, restaurants, cafes, hotels with spas, and even half-a-day and full-day excursions going to an elder warehouses of General Stores or the Provincial Reserve Parque Luro.

To the north is Tierra de Cawel, with the flavors of gourmet gastronomy, polo practices, the history of cattle-raising and its legacy. The route of Handcrafts leads us to the Heartbeats of the Caldén Forest and the Pampean West, where wise hands achieve, with ancestral techniques, original certified pieces of artisanry. What's more, Ideal hills for trekking appear in the various flows of volcanic plains in the Pampean Payunia.

Ideal sceneries for ecotourism are the Parque Luro Reserve and the National Park Lihué Calel, where guide interpreters unveil the secrets of the Pampean flora and fauna and the hills: deer, caldenes (local trees), Pampean daisies, guanacos, foxes, birds and cave paintings. In the South, the Colorado River waters the vineyards and invites visitors to walk through its coasts, its enclosing walls and soft curves, go kayaking and discover footprints in ancient flows of petroleum and the cretaceous remains, the wine tourism, the Touristic Village Casa de Piedra and the extended salt mines.

Pampean Experiences

The Route of Pampean Wine presents a combination of vineyards and wineries in flat lands and curly plains, with great temperature variation and endless hours of brightness. The Route of Crafts of the Pampean West leads to sites where one can appreciate and acquire pieces of fabric, leather, Caldén wood, shaft and silver.

The Historic General Store Network invites you through a rural passage in centennial chateaus, with brick walls on sight, exposed wood beamed ceilings, heart pine wood furniture and typical objects of these centennial stores.

Local tourism in rural residences with varied activities, gourmet gastronomy and Argentinean barbecues with the best meat in the world.

Ecotourism with a clear observation of the flora and fauna with differentiated environments, like dunes, lagoons, salt mines and the only forest of Caldenes in the world.

The Sighting Season for Deer in Rut, between March and April, also visiting the distinguished castle from the first hunting ground in Argentina, nowadays known as a historical monument.
